DIAMANT

A WORLD FIRST FOR PORCELAIN

FINE DIAMOND
PORCELAIN
VON SELTMANN WEIDEN

DIAMANT – the new porcelain range from SELTMANN WEIDEN

The product development technicians in the Seltmann Group have for many years been researching and experimenting with porcelain materials to achieve porcelain which combines the strength and durability of hard porcelain together with the translucency and soft colour of the finest Bone China.

The result achieved is porcelain which, as well as a cream-coloured appearance and silky-smooth feel, has a warm, soft look. Thanks to the significantly improved resistance and hardness of the porcelain clay and glaze, this unique porcelain now has a superlative chip and scratch resistant finish which, combined with the colour and translucency, no other porcelain china has.
